

Blinn College Health Science Camp

Permission for Activities in Ambulance and Birthing Simulation

Part I:

During the week of camp, we will be conducting training with the campers learning the function of an ambulance during emergencies and the use of a backboard and loading the ambulance with a stretcher. All training will be done under the supervision of multiple faculty and trained students in the EMS Program.

You as the parent or guardian may prefer the student just observe rather than participate. Please check the preferred box for this activity.

- My camper has permission to participate actively**
- My camper can only observe during this activity.**

Part II:

Also, during the week of camp, there will be an activity/simulation designed to demonstrate the birthing process. It will be simulated and not a real/live birth but want to gain your permission for this activity for your student participation.

- My camper has permission to participate actively**
- My camper can only observe during this activity.**
